

Adeel Shaikh

Karachi, Pakistan | +92 315 497 2005 | adeelshaikh912@gmail.com | github.com/adeelnotfound

Education

Muhammad Ali Jinnah University

Karachi, Pakistan

B.S. Computer Science — Expected 2027

- Relevant Coursework: Software Engineering, Database Systems, Data Structures & Algorithms, Object-Oriented Programming

Internship

The Automators (Pvt.) Ltd.

Karachi, Pakistan

Automation Engineering Intern

August 2026

- Completed a 4-week hands-on internship focused on industrial process automation, gaining practical exposure to PLCs, DCS, and SCADA systems
- Studied various controller architectures (PLCs, SBCs, SLCs, DCS, SCADA, PACs) alongside core process variables and measurements, including pressure, level, and flow
- Trained on Honeywell Experion software (runtime, development, and diagnostics) and Experion hardware, including servers, FTE network stations, and C200/C300 controllers
- Assisted in configuring and setting up Experion station PCs and servers, including system setup and network integration within the control room environment

Projects

Nutrideel — AI-Powered Calorie & Nutrition Tracker

React Native · Expo · TypeScript · Gemini API · AsyncStorage

- Designed and built a full offline-first calorie and macro tracking app with meal, weight, activity, and fasting logging, SVG-based progress charts, and a thermodynamic weight-forecasting engine
- Integrated Google's Gemini API for natural-language food estimation and an AI coaching chat, backing it with a fully offline heuristic engine so core features work without a network connection or API key
- Implemented on-device data persistence, unit conversion, local notification reminders, and haptic-driven animated UI feedback; configured the project for Android distribution via EAS Build

Aromatic Aura — Recipe Discovery Mobile App

React Native · Expo · TypeScript · TheMealDB API · AsyncStorage

- Built a 4-screen cross-platform cooking app in React Native/Expo that lets users browse trending global dishes, view step-by-step instructions, and save favorites to a personal collection
- Integrated TheMealDB REST API to pull live recipe, ingredient, and image data, with client-side caching to keep browsing fast and offline-tolerant
- Packaged and shipped a standalone Android APK, taking the project from prototype through a distributable build

Technical Skills

Languages & Frameworks: C++, C#, Python, JavaScript, TypeScript, React Native, Object-Oriented Programming (OOP)

Tools & Platforms: Git, GitHub, Expo, EAS Build, Visual Studio, Linux CLI, REST APIs, Microsoft Office Suite

Networking: TCP/IP, IP Addressing, Network Infrastructure, Cisco IOS Basics

Certifications

Industrial Networking Essentials (DCN IA) — Cisco Networking Academy

- Completed training in TCP/IP fundamentals, IP addressing, network infrastructure design, and foundational Cisco device configuration

Professional Strengths

Collaboration & Teamwork | Time Management & Prioritization | Problem Solving | Strong Written English Communication

Languages

English: Professional Working Proficiency **Urdu:** Native Proficiency
