PROJECTS

Nutrideel — AI-Powered Calorie & Nutrition Tracker — *React Native, Expo, TypeScript, Gemini API*

- Engineered a full offline-first tracking app spanning meals, weight, activity, and fasting logs, with SVG-based progress charts and a thermodynamic engine that forecasts weight trajectory
- Integrated Google's Gemini API for natural-language food estimation and an AI coaching chat, and paired it with a custom offline heuristic engine so core logging never depends on a network connection
- Built on-device persistence, unit conversion, local notification reminders, and haptic feedback end-to-end, then configured and shipped an Android build pipeline via EAS Build

Aromatic Aura — Recipe Discovery Mobile App — *React Native, Expo, TypeScript, TheMealDB API*

- Designed and shipped a 4-screen cross-platform app for browsing trending global dishes, following step-by-step instructions, and saving favorites to a personal collection
- Integrated TheMealDB REST API for live recipe, ingredient, and image data, adding client-side caching to keep browsing fast and usable offline
- Took the project from prototype to a packaged, distributable standalone Android APK

EXPERIENCE

The Automators (Pvt.) Ltd.

Karachi, Pakistan

Automation Engineering Intern

August 2026

- Completed a 4-week hands-on internship in industrial process automation, working inside a live control-room engineering team
- Studied controller architectures (PLCs, SBCs, SLCs, DCS, SCADA, PACs) and core process variables — pressure, level, and flow — underlying plant control
- Trained on Honeywell Experion software (runtime, development, and diagnostics) and hardware including servers, FTE network stations, and C200/C300 controllers
- Partnered with a senior engineer to commission an Experion server, configuring secure remote access within the control room network

EDUCATION

Muhammad Ali Jinnah University

Karachi, Pakistan

B.S. Computer Science — Expected 2027

- Relevant Coursework: Software Engineering, Database Systems, Data Structures & Algorithms, Object-Oriented Programming

TECHNICAL SKILLS

Languages & Frameworks: C++, C#, Python, JavaScript, TypeScript, React Native, OOP

Tools & Platforms: Git, GitHub, Expo, EAS Build, Visual Studio, Linux CLI, REST APIs

Networking: TCP/IP, IP Addressing, Network Infrastructure, Cisco IOS Basics

CERTIFICATIONS

Industrial Networking Essentials (DCN IA), Cisco Networking Academy (Dec 2025) | IBM SkillsBuild: Cybersecurity, AI Literacy & Generative AI (Aug 2026)
