EDUCATION

Muhammad Ali Jinnah University

Karachi, Pakistan

B.S. Computer Science — Expected 2027

- Relevant Coursework: Software Engineering, Database Systems, Data Structures & Algorithms, Object-Oriented Programming

INTERNSHIP

The Automators (Pvt.) Ltd.

Karachi, Pakistan

Automation Engineering Intern

August 2026

- Completed a 4-week hands-on internship in industrial process automation, gaining exposure to PLCs, DCS, and SCADA systems
- Studied controller architectures (PLCs, SBCs, SLCs, DCS, SCADA, PACs) and core process variables including pressure, level, and flow
- Trained on Honeywell Experion software (runtime, development, and diagnostics) and hardware including servers, FTE network stations, and C200/C300 controllers
- Worked alongside a senior engineer to commission an Experion server, configuring the software for secure remote access within the control room network

PROJECTS

Nutrideel — AI-Powered Calorie & Nutrition Tracker — *React Native, Expo, TypeScript, Gemini API*

- Built a full offline-first calorie and macro tracking app with meal, weight, activity, and fasting logging, plus SVG-based progress charts and a thermodynamic weight-forecasting engine
- Integrated Google's Gemini API for natural-language food estimation and an AI coaching chat, backed by an offline heuristic engine so core features work without a network connection
- Implemented on-device data persistence, unit conversion, local notification reminders, and haptic-driven UI feedback; configured the project for Android distribution via EAS Build

Aromatic Aura — Recipe Discovery Mobile App — *React Native, Expo, TypeScript, TheMealDB API*

- Built a 4-screen cross-platform cooking app that lets users browse trending global dishes, view step-by-step instructions, and save favorites to a personal collection
- Integrated TheMealDB REST API to pull live recipe, ingredient, and image data, with client-side caching to keep browsing fast and offline-tolerant
- Packaged and shipped a standalone Android APK, taking the project from prototype through a distributable build

TECHNICAL SKILLS

Languages & Frameworks: C++, C#, Python, JavaScript, TypeScript, React Native, OOP

Tools & Platforms: Git, GitHub, Expo, EAS Build, Visual Studio, Linux CLI, REST APIs

Networking: TCP/IP, IP Addressing, Network Infrastructure, Cisco IOS Basics

CERTIFICATIONS

Industrial Networking Essentials (DCN IA) — Cisco Networking Academy

- Completed training in TCP/IP fundamentals, IP addressing, network infrastructure design, and foundational Cisco device configuration
